

COMMENDATION FOR SUSTAINABLE ARCHITECTURE

PETTIT & SEVITT REVIVAL

LIGHT HOUSE ARCHITECTURE & SCIENCE

On an elevated site with views of Woden Valley, is perched the reinvention of classic modernist architecture. An original Pettit and Sevitt Lowline from the 1960s has been transformed into an energy efficient and thermally comfortable family home.

Importantly to the client, care was taken to ensure that interventions would remain faithful to the mid-century architecture without compromising on function or charm. The salvage and re-use of much of the existing building fabric demonstrates that thermal comfort and energy efficiency can be achieved without a price to Canberra's architectural heritage.
